

Join us at IWRA's
1st ISLANDS WATER CONGRESS
in the Faroe Islands
Hosted by Jarðfeingi

4th - 6th September 2024
Tórshavn, Faroe Islands

FRESHWATER AND ISLANDS: ADMINISTRATION, COLLABORATION, AND INNOVATION

The International Water Resources Association (IWRA), in partnership with the Faroese Geological Survey (Jarðfeingi), will host a high-level congress on Freshwater and Islands in the Faroe Islands from September 4th - 6th, 2024. The congress aims to address water challenges faced by island communities offering tools for specific issues. The event will cater to a global island audience and, notably, small island developing states (SIDS).

It endeavours to transcend the boundaries of a conventional academic gathering, incorporating a policy-oriented approach that will captivate water professionals working in islands, including the younger island generations. Additionally, the congress will celebrate the significance of freshwater within an island context, embracing the realms of arts, culture, and youth engagement.

Visit www.islandswatercongress.org to stay up to date with the latest developments and the call for papers.

INTERNATIONAL WATER RESOURCES ASSOCIATION'S
1st ISLANDS WATER CONGRESS
FAROE ISLANDS - SEPTEMBER 4-6, 2024

Why attend

For Practitioners

(Water Managers and Technicians):

- Connect with industry professionals, experts, and peers.
- Share experiences, challenges, and best practices.
- Learn about cutting-edge water management technologies and research.
- Gain insights into emerging trends, regulations, and standards.
- Explore case studies and success stories for practical solutions.
- Get inspired by innovative projects and advancements.

For Private Sector Professionals

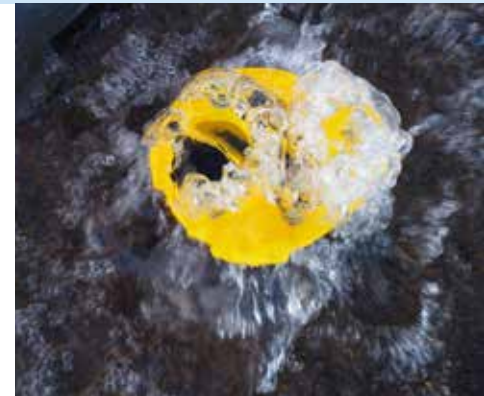

(Industry and Company Representatives):

- Gain insights into industry trends, market demands, and emerging technologies.
- Explore new business opportunities, partnerships, and joint ventures.
- Stay informed about regulatory changes affecting your business.
- Connect with decision-makers, industry influencers, and experts.
- Build relationships for business growth and partnerships.
- Showcase your leadership in panel discussions and workshops.

For Policymakers

(Politicians and Technocrats):

- Learn about successful policies and strategies from diverse regions.
- Exchange ideas and best practices with global peers.
- Gain insights into public perspectives on water issues.
- Use information to communicate policies effectively and engage with voters.
- Leverage your platform for positive change in water management.

For Academics/Researchers

(Sciences, Policy, and Law):

- Stay updated on the latest water-related research trends and advancements.
- Establish collaborations, partnerships, and research projects.
- Enhance research skills through workshops, training, and seminars.
- Contribute to global efforts in addressing water-related challenges.

ABOUT US

INTERNATIONAL WATER RESOURCES ASSOCIATION'S
1st ISLANDS WATER CONGRESS
FAROE ISLANDS - SEPTEMBER 4-6, 2024

THE INTERNATIONAL WATER RESOURCES ASSOCIATION (IWRA)

The International Water Resources Association (IWRA) is a globally recognised non-profit, non-governmental organisation that was established in 1971. With a strong emphasis on collaboration between science and policy, IWRA serves as a knowledge and research-based forum dedicated to addressing pressing water challenges. IWRA's overarching goal is to enhance the understanding of water issues and foster sustainable water use and management worldwide. Through a multifaceted approach encompassing education, research, and information exchange, IWRA strives to facilitate informed decision-making and promote effective water management.

JARÐFEINGI
Faroese Geological Survey

JARÐFEINGI (THE FAROESE GEOLOGICAL SURVEY)

The Faroese Geological Survey (Jarðfeingi) is an institution under the Ministry of Foreign Affairs, Industry and Trade. The mission of the survey is to administer, research, consult and teach about natural geological resources and values as a whole. Additionally, Jarðfeingi is responsible for all administrative tasks related to hydrocarbon and groundwater exploration and production activities in the Faroe Islands.
